Hello, my name is Srihari, and I have a total of 8 years of experience in the software development industry. Throughout my career, I have worked in various roles, including full stack development, testing, deployment, and maintenance. Currently, I am involved in a challenging project where ——
—

In terms of technologies, I have a strong background in both frontend and backend development. On the frontend side, I am proficient in working with React, Angular, HTML, CSS, and JavaScript. When it comes to the backend, I have extensive experience with Java 8, J2EE, REST, Spring, and Spring Boot. Additionally,I have a strong proficiency in working with a range of databases, including SQL, MySQL, Oracle, and NoSQL databases such as DynamoDB. I am also comfortable working with various cloud platforms, particularly AWS, and I have hands-on experience with EC2 instances.

Throughout my career, I have gained expertise in utilizing package managers, build tools, testing frameworks, and deployment methodologies. Some of the tools I am familiar with include Node.js, npm, Maven, Jest, Jenkins, and other CI/CD tools.

In terms of project methodology, I am well-versed in Agile practices, which have helped me deliver projects efficiently and collaborate effectively with cross-functional teams. Moreover, I have worked across multiple domains, including healthcare, finance, banking, and insurance.
